ACO Pty Ltd

Dear Valued Customer

RE: Price Increase

Please be advised of a price increase for ACO products effective July 1.

There has been a 10% increase for all ACO products.

These increases have been a direct result of price rises in polyester resin and plastic powder along with continued uncertainty around fuel and transport costs.

I appreciate a greater time frame for implementation is normally in place, but I would ask in the current climate if we could get assistance from you to have this implemented effective for July 1.

Please contact me directly if you have any questions.

Regards

Yours Sincerely

Gary Bukowski
