Price Adjustment Notification Effective 1st April 2026

Dear Valued Customer,

We wish to inform you that a price adjustment for Eaton's Circuit Protection and Controls (CPC) products will take effect on **1 April 2026**.

Eaton remains committed to delivering innovative, high-quality, and cost-effective power management solutions, supported by our long-standing commitment to responsible and sustainable business practices. This commitment underpins the value we provide to the market and, in turn, the value proposition of our channel partners.

To continue delivering on these standards, we will be implementing a **general price increase of approximately 5%** across most CPC products. Some specific items may experience higher or lower adjustments due to changes in material costs or necessary price corrections.

Updated price files reflecting 2026 pricing will be issued in **early March 2026**. Please ensure your systems are updated so that new pricing becomes effective on **1 April 2026**.

This price adjustment is driven primarily by increased supply chain and production costs, including rises in raw material pricing.

We appreciate your continued partnership. If you have any questions regarding this announcement, please contact your local Eaton representative.

Sincerely,

Eaton Electrical ANZ Team
