## Price Adjustment Notification – New Effective Date: 15 April 2026

Dear Valued Customer,

**Due to ongoing global fluctuations in raw material and energy costs, we have undertaken additional internal reviews to ensure we minimise the impact of these changes on our customers. As a result, the release of updated price files has been rescheduled to the middle March 2026.**

To ensure you have adequate time to update your systems and prepare, we will now issue the updated 2026 price files by **16 March 2026**, with the new pricing to become effective on **15 April 2026**.

As previously communicated, the upcoming price adjustment reflects increased supply chain and production costs. While most CPC products will see an adjustment of approximately 5%, some items may vary above or below this level due to specific cost-structure changes.

We appreciate your patience and understanding as we finalise this process, and we value your continued partnership.

If you have any questions or require further assistance, please contact your local Eaton representative.

Sincerely,

**Eaton Electrical ANZ Team**
