

Dear Colleagues,

In recent months, you would be aware of the fluctuations in the price of Copper.

Klein Tools have been weathering these increases, however, it has become unsustainable and the price must change.

Based on the London Metal Exchange pricing, recent procurement orders have endured substantial increases.

Please be aware that as of the 10th of March 2026, the ALCO categories:

Copper Lugs and Links	+15%
Bi-Metal lugs and Links	+ 5%
Terminals	+ 5%

...will be subject the indicated increases. These will run concurrently with other D rate lines expiring at the end of June 2026. Forward orders and Back orders shall be limited to current stocks. Rate schedules are being prepared and shall follow shortly.

Please contact us should you have any questions arising from this advice.

Best Regards,

B-Type Agencies Pty Ltd
