Re: NOTIFICATION OF PRICE CHANGE EFFECTIVE 01/06/2026

Dear Valued Customer,

We are experiencing significant and sustained cost increases across all areas of our business. These cost increases are largely being driven by global shortages in raw materials and increases in fuel and transport costs.

The market is currently so volatile some of our supply chains are providing daily updates on costs which we have been absorbing to ensure continuity of supply to our partners.

We have been monitoring these increases closely and they are now at a level that we have no choice but to pass on a price increase effective on June 1, 2026.

We are committed to delivering our customers with the right solutions for their needs. If you have any questions, special requirements or project enquiries please call us on 1800 66 99 99.

Thank you for your support.

Regards

Craig Moulin

General Manager
