

30th April 2026

Subject: Price Increase Notification – Effective 1 June 2026

Dear Valued Customer,

Thank you for your continued support and for your patience as we work through a high volume of orders currently in our system.

We wish to advise the market that price adjustments will apply to PVC and PE100 pipe and fittings, site delivery charges, and selected ancillary items, with changes scheduled to take effect from 1 June 2026.

We also wish to inform you that pipe lubricant charges will now apply where lubricants are supplied as part of your order. This change reflects increased supply costs and ensures we can maintain product quality and service standards.

Items Affected by the Price Adjustments (Effective 1 June 2026)

- **HDPE Pipe** – pricing will increase up to 20%.
- **PVC Pipe** – pricing will increase up to 5%.
- **Conduit Bends and Fittings** – pricing will increase up to 10%.
- **Site Delivery Charges** – a revised delivery fee structure will apply.
- **Pipe Lubricants** – will be added to our price lists and will no longer be supplied at no charge.

Why These Adjustments Are Required

These changes are driven by ongoing cost pressures across our supply chain, including resin, additives, rubber rings, packaging materials, fuel, and freight. While we continue to pursue internal efficiencies, the scale and persistence of these increases require pricing adjustments to maintain product quality and service reliability.

Order Management

All existing and new orders not delivered and invoiced before 1 June 2026 will be updated to the new pricing. Your Pipemakers Australia sales representative will contact you to discuss any affected orders and provide the option to amend or cancel if required.

We appreciate your understanding and will continue to support your business through this transition. Our team is available to assist with planning and to answer any questions.

Yours faithfully,

Stuart Stirling
General Manager – West Australia
Pipemakers Australia Pty Ltd
